

# Room 1 Newsletter – Week 1 – Term 4

## Technology – Growing Kumara

In Room 1 we have begun our Technology Inquiry Unit about Kumara.

We will be investigating how kumara are grown commercially, what the production process is and where the kumara are sold around the world.

The unit will end with the children designing their own packaging container for vegie chips.

We are at present writing a kumara cookery book. The recipes that we come up with are going to be 'tested' at school and awarded prizes for the top three recipes.

This Term we are going on our end of year trip to Dargaville and Kaiwi Lakes. We will be visiting The Kumara Box (a working kumara farm/museum), Delta Produce (the kumara processing and packaging company), and of course enjoy a camping experience at the beautiful Kaiwi Lakes.

Phew!!! An exciting time ahead!
