

Kiaora from Room 2!

At the end of last term Room 2 planted a vast array of vegetable and herb seeds. We planted tomatoes, spring onions, courgettes, beans, lettuces, beetroot, carrots, spinach and radishes, along with some herbs.

The seeds grew considerably over the holidays and earlier this term the students were able to plant their seedlings outside in the planter boxes.

We hope to create some delicious recipes using the fresh vegetables and herbs and calculate how cheap it is to eat fresh foods, with a few pantry staples. Donations of some pantry staples, such as flour, pasta, rice and cheese would be gratefully received!
