

# News from Room Five

Kia ora koutou. Room Five have had a great start to Term 3 exploring the principles and elements of art while using different mediums within their art work. Our focus is using recycled materials to create geometric forms such as a recycled city, Picasso faces and foil art so be prepared to be feel wowed and proud of your tamariki in the art exhibition.

In Mathematics we have been busy using standard and nonstandard methods to measure everyday items included ourselves. Malia and Athena wanted their measurements to be as accurate as possible. Well done girls!

Many parents will remember having fun using Cuisenaire Rods to aid the understanding of addition and subtraction. They are back in fashion and the children have been excited to use them by challenging themselves with equations from ten to twenty. How fantastic is that, great work everybody!
