

Room Five

Kia ora Koutou

Room five have had a great start to the year with the excitement of tadpoles. Even though we haven't been able to swim, the pool has still been a blessing. I think you will agree that Uncle George looks just as thrilled as the children. We have been studying the life cycle of frogs. Did you know, that a frog with a small tail is called a *froglet*.

We have also been looking at our goals. This term is looking at LOVE. Plenty of that was shown by Kairarawa helping Tumanako and Mita with their kete. We are filling these with messages of kindness.

Rekohu was thrilled to receive a prize when Lumino - The Dentist and Waipapa & Districts Lions visited to teach us about dental hygiene. Keep those pearly whites shining everyone.
