

Kia ora from Miss Lawson and Mrs Smith!

Here is today's plan for you to complete over the next few days. Remember it is up to you to complete these, at your own pace and remember to ask for help if you need it. If you want to send me your work feel free to email it to me or post it on the Facebook page. Enjoy!

Read: Find a book in your home and read it to your parents/caregivers.

Imagine if you got to meet the author of your story? What questions would you ask them? Write these down and we will revisit them at a later date.

You might want to question the author about the characters, the setting (where the story took place), the plot (what happened) or something you didn't agree with.

Write: Describe someone you know well. It could be mum, dad, nana, aunty, your brother or your sister. Use these to help you:

What do they look like?

What do they sound like?

How old are they?

What is their favourite food/colour/sport?

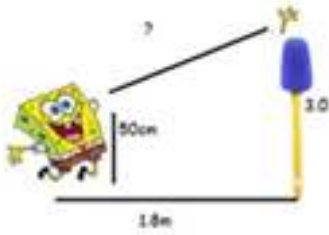

What are some interesting things about them?

Try and use those descriptive words and synonyms we were using in class!

Spelling:

Scribble spelling. Draw some lines all over a page (like in the picture) and in each section, write your spelling words (from our last activity sheet) as many times as you can.

Investigate this maths problem—remember there are lots of ways to solve it!

Georgia lives on Keruhia Street. She is playing with the name of the street she lives on using numbers. She decides that all of the consonants equal 8, and all of the vowels equal 2.

So the value of her street name is $8 + 2 + 8 + 2 + 8 + 2 + 2 = 32$

What is the value of your street/road name?

Can you find at least 5 other road names that have a value higher than Georgia's?

Can you find a road or street name with a total that is a tidy number?

What is the biggest value a road name of six letters can have?

What is the biggest value that you can actually find using a road or street name in NZ?

Explore and investigate:

Oh no... Mr Willy Wonka needs a new chocolate making machine because Augustus Gloop broke it!!!

Your task is to design a new one for him and explain how it works...
Make sure you give it a name!
