

Bee News from Room 5

Kia ora Koutou,

This term the children in Room 5 have been buzzing, learning many facts about bees. They have learned why bees are so important to our survival and eco system. In their learning they included maths with the geometric shape of hives and honey comb, art with amazing paper-mache bees and hives, and literacy with narrative writing.

We are always very thankful to all our awahi hour seniors who come and support us with our learning. We love having you to help!

Alaya and Tangaroa were very happy with their designs and art work. Very creative!

Ethan was very thoughtful providing morning tea with a delicious beehive cake.
