

Kia ora from Room 7

Wow, our seeds grew into seedlings and now LOOK at our alphabet vege garden! We took a koha of spinach to Room 1 for their beautiful birds. We have also learnt to make fat/seed balls, which we put in our bird feeder so our birds can get strong over the winter months ready for springtime nesting.

This term our P.E programme has been learning small ball skills and now we have started some distance running to get ready for our first cross country race at Totara North School at the end of the term. Wheelie Day was fun and so was our experience in the starlab dome where we are now continuing to learn about Planet Earth and beyond in science.
