

NEWS FROM ROOM ONE.

Term two has been busy and exciting. We are only halfway through and already we have had a visit from Star Lab, a stunning performance of the story of Mahuika, ki-orahi with Sport Northland, and an exciting Friday rotation in Room's 1-4 where the children are doing a variety of science and technology related activities. Our focus for the term is on Planet Earth and Beyond – Below are some pictures of the children building a lunar lander, and exploring samples from an ice planet in Room One.

The children exploring ice samples using colour and salt, while Dan and Beryl (below left) build a lunar lander with marshmallows for astronauts.
