

Kaeo School at Home

Room 6

Number 1 Date 23 August 2021

Hi from Mrs Goscomb,

How are you? I do hope that you are all well and finding things to do in your bubble. As we can't go to school due to Covid, I have put some activities together and set some goals for you to try to complete in the next couple of days. Please get an adult to explain the activities to you. Be kind to your helpers and have fun learning! You don't have to but you can email me, christine.goscomb@kaeo.school.nz if you want to, or if you like, post pictures of your work on our new Facebook Page. Have fun and Stay Safe, Mrs Goscomb.

READ

Read a book in your home or on line to or with your parents. Write the title of the book. Draw a picture about the book. Take turns and ask each other questions about the book with these key words e.g. **Who** was in the story? **What** happened in the story? If you would like to try using a new online reading programme called **Reading Eggs** please email me so that I can send you your login name and password.

Who

What

Where

When

Why

How

Each week we will be focusing on a special **Letter of the Week**. This week the letter is **Pp**. Take time to look around your bubble and see what you can discover that starts with this letter. Collect the things that you find. Think of other things that start with the letter. Draw pictures of these things and label them making sure you write the letter **p** correctly. You might like to try to write a sentence, or more about what you discover or make up a story of your own. Start with a capital letter, use key words, leave spaces between your words, reread your writing, check it makes sense and put in a full stop, E.g. **P** is for the **Peter and Paul** the birds who are in our **Play**.

Developing your number sense. This week I want you to focus on your number knowledge. We need to be able to say and write our number sequence patterns, forwards and backwards.

We are learning to count in ones but also skip counting in 2's, 5's and 10's. Practise making your numbers in lots of different ways e.g. write your numbers, use play dough, make your numbers outside with sticks or pebbles. If you write your numbers on card or paper then cut them up, you can practise putting the numbers in order. Ask someone in your bubble to give you a **before and after number quiz**, using the numbers you have made, you find the answer for each question asked. What number comes after 6? What number comes before 16?

To help us with our spelling we need to know the sounds of the letters of the alphabet. Make time to practise your alphabet, you need to know the letter names and the sounds the letters make. Use your alphabet chart or sing songs on YouTube. Extra for the experts is to learn about the blends. Make a list of 5 words starting with **p** to learn for your spelling words this week. Be a **Word Detective** look for **words** in books, in magazines, on food packaging etc.

Scientists discover the world around them by using their senses. Our 5 senses are **Seeing, Hearing, Tasting, Smelling and Touching**. For the next couple of days I want you to focus on using your eyes and your **sense of sight** to discover more about your bubble. Your challenge is to find as many interesting things, that you can see, as you can in your bubble. Talk and record, about what you can **see**. Sight lets us see **different sizes**, what's the biggest thing you can see? What's the smallest thing you can see? **Different colours**, what's yellow? what's red? **Different shapes**, What's round? What's square? Can you see things that move and things that don't move? What is the most beautiful thing that you can see?
