

Kia ora from Room 3!

Room 3 has had a great Term learning about different art mediums. Such as print making, clay sculpting and positive and negative paper art. We hope you were able to visit our art exhibition and view all the wonderful art we have all made.

We have been learning about the different stars of Matariki. Our main focus has been on, Tupuārangī-the star connected to food grown above ground. Room 3 created their own "Mini Greenhouse" to germinate their own Pea seeds to take home and grow over the holidays. Room 3 has learnt a lot about gardening through learning in class and from Mrs Molesworth, who helped us turn our class garden into a sacred garden during our School's Matariki celebration day!
