

MEASUREMENT - TIME

In Room 5 it was time to learn about TIME!
We have been practicing ordering days of the week and months of the year.

We learnt the poem '30 days has September' and discovered a way to use our knuckles to remember how many days each month has.

We have been making our own clocks and learning how to read the time o'clock, half past, quarter past and quarter to.

Each morning we practice reading the date in Te Reo and find the day and month that comes before and after.

OUR READING ROCKET

Our space rocket that we designed for the Art Exhibition last term flew its way to Room 5 and is now our quite reading nook.

Our Star of the Day students read a story after lunch to the class. They are practicing their fluency, volume and expressions when reading. The rest of Room 5 are demonstrating excellent listening skills.

READING TO OTHERS

LISTENING TO OTHERS
