

Kia ora from Room 3!

Sphero

This week we have been getting to know our new math tool, Sphero! We all had the opportunity to drive the Sphero around using the iPad. We have learnt that it is best to slow its speed right down so that we have better control. We have also learned how to calibrate it and change its colours! We cannot wait to learn more about coding!

Art

We have also been learning about blending paint in art. We had a guided drawing lesson, which helped us to create our landscape picture. We learnt about the different parts of a landscape drawing like, background, foreground, and the horizon. The photos show a few examples of Room 3's great work.
