

Room 5 Week 1 Term 4

GARDENING

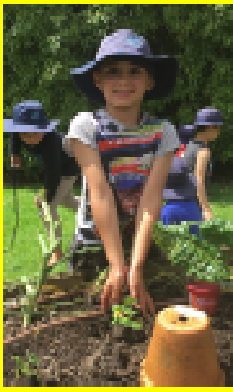

Spring is here and this week

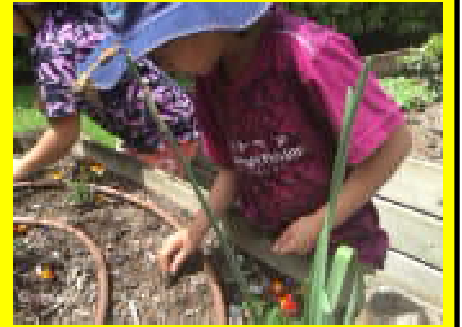

Room 5 have been busy in our class garden. After some great rain on Monday, we were able to then get out on Tuesday to clear and tidy up our garden.

We turned the soil and spotted lots of big fat worms enjoying their home. We planted some

strawberry plants and then sowed some sunflower seeds. It will be fun to watch these seeds grow over the summer. They are very special as they are the seeds we harvested from last summers sunflowers.

Trident and Hartley taking care of our potato plants.

MATHEMATICS

We started this term with looking at patterns in Maths. We practiced making patterns using different materials, showing reflection and symmetry. We shared our patterns with each other to help get some ideas for our floral sand saucers that we will make on Friday for Pet Day.
