

Room 3 Update

Kia ora e te whanau,

This week Room 7 has had their first lesson with Rosie about freshwater habitats. She focused on Healthy water and what it means to our living world. We learnt about

what can be harmful to our rivers and streams and what we can do to prevent this. We are excited

for our next lesson and then our Field Trip to our own awa where we will do

some water testing and see what is

living in the water. We also have been busy making compost with Room 1 garden group. Next step will be planting our Alphabet vege garden.
