

## Room 5 - Science -The Living World

Tennyson checking the clarity of the water with the help from Malachi and Justice.

Mia and Rosie checking the pH level of the water.

Honey identifying creatures her group has found.

Look at what was caught in the traps. There are lots of inanga (whitebait). Can you spot the elver (baby eel)?

We have been working with Rosie Palmer from Whitebait Connection, learning about creatures that inhabit our freshwater ways. We went on a field trip to investigate the Kaeo River. We checked the clarity, temperature and pH level of the water, caught creatures with our nets and identified them on an ID chart.

Bertie scooping out what she has caught in her net.
